## About

Vivian Chen is a self-taught web developer and a designer. She perseveres in frontend technology with her interests in web animation, data visualization, and interactivity. Coming from a design background, she focuses on not only the functionality and performance of a website but also usability, visual design, and user experience. In the process of product development, she prioritizes communication within the team, between users and stakeholders. Her experiences as a UI/UX designer and her continuous pursuit of user-centered design are her greatest asset as she transitions into the role of developer. She strives to be a bridge that connects people and optimizes the product development process.

## Projects

**Tale - A diary app for your pets' well-being**          Sep 2022 – Dec 2022

Developer, Designer          github.com/vivianycc/tale-app

Tale is a diary app made for your pets. You can record what they've been eating, keep track of their health measures, and save a list of the food they like.

**Google Calendar Clone**          Jun 2022 – Aug 2022

Developer          github.com/vivianycc/calendar-app

This is a project of practice made with React. The user is able to create, update, delete events in this calendar app

**A Little Fish Game**          Apr 2018 – Apr 2018

Developer, Designer          www.vivianychen.com/pixi_tutorials/pixi_tutorial_1

A little game that is about feeding a fish.

## Work

**Xtars Live Media**          Mar 2019 – Apr 2021

UI Designer          www.xtars.com

Vivian worked as the leading UI designer of the product app that endeavors to enrich social engagement between the live streamers and users.

Highlights

- Set the entire visual design and started a style guideline for the entire app.
- Utilized web development skills to prototype and validate designs and improve communications with the engineering team.
- Planned and Designed a brand new homepage that provides user abundant entertaining content and allows the operation and marketing team to utilize the design and run their campaigns.

## Volunteer

**Women Who Code Taipei**          Sep 2018 – Apr 2019

Lecturer          womenjointechcodingclub.github.io

This project introduced resources to people who are interested in coding in rural areas.

Highlights

- Outlined a design curriculum and guided the student to go through a product design process.
- Designed a web development curriculum that allows the student to make a personal website with basic HTML&CSS.
